

Our educational trip to Italy

The month before all teams of Erasmus project visited Italy, Cave Town, as the last trip for the project. The Greek team stayed there one week. For me it was the second time that I visited Italy but this time it was better than the other as I visited a lot of places and because I had also my friends there (that I had met from their visited in Greece by erasmus project also).

Concerning the trip I passed perfect. First we visited a place in Italy with a lot of history. About my opinion for this trip I learned a lot about refugees and immigrants and how Italy "manages" them. Also I saw Rome of the top of the church of Sant Pietre and I learned a lot about every square that we visited. I liked also that I saw the inside of Colosseum and Roman Forum. Also we visited Villa D' Este in Tivoli a suburb of Rome, archeological museum of Palestrina, museum of Liberation and at the end the geopalentological museum and planetarium in Rocca Di Cave. Finally I learned a lot about the Italian culture at the past of the years and I have to say that it was the most beautiful, incredible and unforgettable experience in my life. I am very happy to have this moments and I want to return cause I pasted perfect !!!!!!!

Our educational trip to Germany

Few months before me and two of my teachers went to Germany under the program of Erasmus. The experience that I got from this trip was a very educational and beautiful experience because we did many activities which helped all the other students from the other countries to learn the town of Germany Köln. Firstly, all German students were very friendly and helpful to everybody who had a difficulty. Secondly, the town of Köln was very beautiful and we had a great time exploring the town with some of the German members of the team. The last think I want to mention is that their civilization was remarkable. To conclude that trip was very pleasant and we all had a great time participating to all of the activities that we were asked to carry out.

Our trip to Kerpen in Cologne with Erasmus+ program

Our trip started on Sunday 10th of February and we came back to Athens on Saturday 16th of February. On Monday, the first day of the program, we met the Erasmus team of the other countries, which was Italy, Germany, Netherlands, Turkey, North Macedonia. Later we each other presented our countries and did a tour to German school. On Tuesday's morning, firstly, we participated to a really innovative training seminar about social integration. After this, we enjoyed a cultural afternoon in the Eiffel, where was the Freilichtmuseum Commern. Wednesday was a cultural day in Cologne. We had the opportunity to visit the breathtaking Cathedral Church of Saint Peter and get into conduct with the local monuments, stores and the enormous river Rhine via the rally tour. In the afternoon, we visited the Chocolate Museum and we went shopping in the city. On Thursday, we had an info day to city hall of Kerpen where we talked with the mayor and an immigrant about immigration in the Germany. Later, we visited the NS Museum Cologne which was a really moving experience. On Friday, our day started with work on twin space and the distribution of the program's certificates. In the afternoon, we enjoyed a goodbye party with of our new friends, full of each country local music and dances, smiles and cheerfulness. In addition, it is noticeable that a really interesting point of the trip was the fact that all Erasmus teams except for german stayed in the same hotel. So, we had the opportunity to get known each other.

To sum up, I want to underline that the trip to Germany was an unbelievably enriching experience. Via this we came into conduct with german civilization, culture, architecture, music, gastronomy and customs, and generally we acquired various knowledge. Moreover, we exchanged opinions about the today's crucial immigration issue which was the subject matter of our program. Undoubtedly, I don't regret participating to this and I would never forget the beautiful moments that I created there.

Our educational trip to Italy

I had a great time at Italy. It was an experience that I'll never forget in my life. The Saturday of 17th we have arrived in our hotel called "La Fonte". It was a good hotel. We stayed at a small town called Cave which is 40 km away from Rome. We have visited Rome 2 days. We saw the Coliseum, Fontana di Trevi, Pantheon and other amazing thing. The trip I like the most was that at Villa d' Este, Tivoli. Also we had a great time with the other people from other countries. The life in Cave was amazing. We ate some traditional dishes like pasta and pizza. Furthermore, I enjoyed hanging out with the other kids from other countries. We share our interests and our habits and we had the opportunity to meet the cultures and the traditions of the other countries.

Our educational trip to Turkey

My first trip abroad was with the Erasmus team in Turkey. Erasmus is a program involving children from different schools in Greece. Not only in Greece but also in other countries, eg Turkey, Holland, Germany, Italy, Skopia. This program was designed to meet children from different countries with different styles.

Turkey is a different country from Greece, but also a beautiful country. When I was going to Turkey I was surprised. Especially Constantinople is beautiful. Constantinople has two airports and has a population of 15 million. It has great attractions such as Hagia Sophia, the Blue Mosque, Top Kapi and others. When I went to Turkey I did not stay in Constantinople but in the town of Eregli. To Eregli is a seaside town. When we were going to our Turkish school, we accepted with joy. At Eregli we have been better informed about the culture of Turkey. We have seen their traditional tales, their customs and customs, their language, their abundance and their way of life. In Turkey I have made many friends who will always stay in my heart. these memories all the things that we have seen and done have never fled from my heart.

I hope I am very lucky to join this unforgettable program. I am also lucky to have the opportunity to visit another country and to make new friends from other countries. I think it is very important to have friends abroad. I have been doing this program I will never forget them. I still want to thank my professors for this unforgettable event. Because it was not for them that I did not know all these facts. Lastly, I wish these trips could do so and others in the future, because these trips were an unforgettable experience.

Our educational trip to Skopje

When I heard about my travel in Skopje, I was so happy about it.

It was the first time that I travelled with airplane and I was really scared about that. When we arrived at Skopje, we went at their school to meet each other. I met new people and all change our numbers and profiles for texting together when our travel ends. I stay 1 week there and everything was so beautiful and interesting. We did many exercises and we had so fun! Every night I was out with my teachers and my friends to eat and to spend our time together even with a bit hours. We saw the refugee camp and everything inside it. Every morning I was in a happy mood when my teachers calling me to get up of my bed. I always ate in the hotel my mornings and at school we ate all together.

I'm so happy that I met so many people with different characters and also different opinions. Every day with them was unique, special and wonderful! I'll never forget those days and I'll never forget them...

Our educational trip to Italy

My trip to Italy was amazing and I feel fortunate to have chosen to go to this country but also I was chosen to get into this amazing program.

In Italy we were amazing. It was the first time I got on a plane and I was excited. When we got off the plane we waited several hours for the rest of the country to go all together with the bus to Cave. When we arrived at the hotel I was thrilled because after many hours at the airport I was beginning to get hungry, although our instructors had given us to eat. We visited many places that made me more impression is the villa in Tivoli, Colosseum in Rome, St. Peter and when we walked to the shops of Rome.

It was an amazing experience, I wish other children in Greece to be as lucky as I do to make such a nice trip.
